The collection, at a glance

Two source lanes. A shared record of origin. One proposed congressional statement.

THE LIBRARY

154 CATALOG RECORDS

Stanton material

S-SERIES

OFFICIAL RECORD

Prepared statements + hearing transcripts

S001 / S002 / S003

DIRECT & REPORTED VOICE

Published Q&A + attributed reporting

S004 / S005–S010

CONTEXT & MEDIA LEADS

Official articles, captions, recording pages

Keep speaker and fidelity labels intact

Research & institutions

R-SERIES

MECHANISMS & CONDITIONS

Recursive training + synthetic-data evidence

Theory, experiments, corrections, versions

MEASUREMENT & CONTROLS

Web studies, provenance + preservation

Methods, sample limits, technical standards

RESPONSIBILITIES & AUTHORITY

Defense policy + civilian institutions

Programs, governance, statutory context

THE PROVENANCE LAYER

Catalog

Identity, rights, versions

`source-catalog.jsonl`

Search log

Coverage, exclusions, gaps

`search-log.md`

Source files

Originals or labeled records

`sources/`

Fixity

Byte-level checksums

`SHA256SUMS`

THE WORKING DOCUMENTS

Research brief

Evidence + counterevidence

Voice analysis

Attributed rhetorical patterns

Witness statement

Bounded policy recommendation

Claim audit

Exact wording + source locators

Records include excerpts and inaccessible leads. Different versions are not independent studies or speeches.

Six questions organize the evidence

An editorial map of research-brief.md. Themes overlap; anchor IDs are representative.

01 WEB MEASUREMENT

What is changing online?

Authorship signals, sampling frames, detector uncertainty and null findings.

Do not mistake prevalence for inaccuracy.

R011 · R012 · R013

02 RECURSIVE REUSE

How can training fail?

Generated outputs enter later training; errors and rare-detail loss can compound.

Conditional findings, not inevitable collapse.

R001 · R002 · R005 · R006

03 COUNTEREVIDENCE

When does synthetic help?

Accumulation, task fit, curation, verification and unsuccessful self-training results.

Better averages do not preserve every detail.

R003 · R007–R010 · R056

04 ORIGINS & RECOVERY

What can preservation do?

Provenance, original objects, checksums, access controls and restoration tests.

Authenticity and intact bytes are not truth.

R014 · R016 · R017 · R035

05 EXISTING RESPONSIBILITIES

Who already does this work?

Defense infrastructure, AI/data governance, records officials and civilian custodians.

There is no institutional vacuum.

S001 · R025 · R046 · R016

06 POLICY IMPLICATIONS

What should Congress do?

A focused command, bounded duties, cost discipline and independent oversight.

A recommendation—not a scientific finding.

R019 · R021 + synthesis

Source findings, qualified inferences and policy proposals remain distinct throughout the package.

The voice is anchored, not invented

A map of the authenticated material used to shape the proposed Stanton testimony.

PRINCIPAL ANCHORS

S001

Prepared testimony

21 May 2025 · official statement

Mission, responsibility, readiness

S003

Hearing record

24 March 2026 · oral + prepared

Stanton’s identified remarks only

S004

Published Q&A

1 May 2025 · publication date

Direct answers; local excerpt

EIGHT OBSERVED TRAITS

- **Mission before technology**
  Lead with the operational need.
  S001 / S003
- **Active responsibility**
  Name the owner. State the duty.
  S001 / S003
- **Short declarative anchors**
  Use compact sentences to set priorities.
  S001 / S003
- **Purposeful imperatives**
  Make “must” carry a requirement.
  S001 / S003 / S004
- **Concrete consequences**
  Connect technical choices to operations.
  S004 / S009
- **A bounded set of priorities**
  Limit the list. Make each item count.
  S001
- **Readiness over activity**
  Ask for outcomes, not motion.
  S003 / S004
- **Clear institutional roles**
  Distinguish partners and responsibilities.
  S001

Borrow the discipline. Do not invent the experience, the quotation, or the endorsement.

Reporting is not a transcript. Captions are not audio-verified. Other witnesses’ words are not Stanton’s.

How the evidence becomes testimony

The architecture of the final third draft—not a chart of an existing organization.

SIX-SECTION ARGUMENT

01 **Opening**
State the need. Ask for establishment.

02 **Risk to the information base**
Explain the mechanism and its limits.

03 **Why this is readiness**
Use one clearly hypothetical example.

04 **A focused command**
Assign four bounded duties.

05 **Congressional direction**
Request authority, a plan and oversight.

06 **Closing**
Demand demonstrated capability.

THE PROPOSED MISSION

Strategic Information Command

Proposed · defense-led · narrow preservation-and-assurance mission

FOUR DUTIES

Identify & prioritize
Mission dependence, uniqueness, origins and risk of loss.

Preserve originals
Separate versions, control access, record custody and test recovery.

Enable traceable use
Carry origins, changes, rights and access conditions.

Demonstrate readiness
Independent restoration tests; task and rare-case evaluation.

THREE CONGRESSIONAL REQUESTS

AUTHORIZE	Narrow mission + named accountability
PLAN	Costed phases + existing capabilities
OVERSEE	Annual reporting + independent review

CIVILIAN BOUNDARIES No archive takeover. No compelled civilian collection. No general content-policing power.

Preservation supports judgment; it does not certify truth or guarantee model performance.
